

Eric Echemane

Full Stack Developer

<https://echemane.vercel.app> - My website

<https://github.com/ericechemane> - Github

eechemane29@gmail.com

0969 594 8292

A skilled Software Developer with 2+ years of experience in designing and implementing high-quality applications. Proficient in software development principles and lifecycle such as Software Testing, Deployment, Continuous Integration and Development, Performance, and Scalability.

Skills

Linux • Typescript • NodeJs Frameworks (NextJs, Nest, React, SvelteKit) • Golang • PostgreSQL • SQL & NoSQL Databases • RPC • Docker • Web Sockets • Redis • Networking • Vercel • AWS

Professional Summary

Software Engineer @ MatchmoPh

November 21, 2023 - Present

- Lead engineer behind <https://matchhome.ph> - a property listing site where we help home buyers find their dream property that matches their lifestyle, income, location, and more.
- Analyze business requirements, write, test, and review code on a daily basis.
- MatchHome was able to quickly generate leads through our property recommendation and search engine optimized property listing that eventually leads to sales.
- Currently working on our new product Matchmo Mobile App.

Full Stack Developer @NewstarsInc.

April 17, 2023 - November 15, 2023

- Implementing pixel perfect, reusable, and testable UI components.
- Involved in the following tasks on a daily basis: daily standups, completing tickets, submitting pull requests, code reviews, conflict resolution, reporting bugs and defects upon investigation,
- Responsible for building microservices/APIs and background workers in Golang and PostgreSQL.
- Responsible for onboarding new team members.
- Support multinational team members from Philippines, Vietnam and Thailand.

Full Stack Developer (Student Freelancer)

Jun 2021 - Nov 2022 (1 year, 5 months)

- During college, I was doing freelance programming. Most of my projects are thesis software requirements of other students from our college and other universities.
- Able to deploy several projects on the internet and helped 10+ students pass their thesis.
- I also do paid programming tutorials online from different cities. They were able to find me through my youtube channel *Eric Echemane*, FB Groups and in my social media accounts.

Strengths

- Deep understanding on how the web works. Specifically HTTP, Rest APIs, API Integrations, Web Security and Accessibility, Web Standards.
- I can design, manage (manage means to make critical implementation decisions) for both UI and UX, database design and developer experience.
- Can implement CI/CD for code quality, automated testing, and deployment.
- I am very confident in GIT and Github and Git collaboration. (Pull requests, branching, resolving conflicts, advanced git commands and tricks) that impact my team for efficient development.
- Team player, with strong attention to details, and with hands-on technique in code reviews.

Educational Background

BSc in Computer Science 2019 - July 8 2023

Pamantasan ng Lungsod ng Muntinlupa.

(I was already doing freelance development when I was in 3rd year)

You can visit my Github or my website as a reference to my skills and public projects

Quick Project Links

MatchHome <https://matchhome.ph>

is a property listing site where we help home buyers find their dream property that matches their lifestyle, income, location, and more.

Pixsoil <https://pixsoil.vercel.app>

A machine learning web and mobile application for soil type classification for plant decision making.
